TERMINAL DISCLAIMER TO OBVIATE A DOUBLE PATENTING REJECTION OVER A PRIOR PATENT

Docket Number (Optional)

In re Application of: LOUIS T. GNECCO and Paula S. Gnecco
 Application No. 08/835,350
 Filed: 04/07/97
 For: ELECTROMAGNETICALLY SHIELDED HEARING AID

The owner, GNECCO ET AL. of 100 percent interest in the instant application hereby disclaims, except as provided below, the terminal part of the statutory term of any patent granted on the instant application, which would extend beyond the expiration date of the full statutory term defined in 35 U.S.C. 154 to 156 and 173, as presently shortened by any terminal disclaimer, of prior Patent No. 5,640,457. The owner hereby agrees that any patent so granted on the instant application shall be enforceable only for and during such period that it and the prior patent are commonly owned. This agreement runs with any patent granted on the instant application and is binding upon the grantee, its successors or assigns.

In making the above disclaimer, the owner does not disclaim the terminal part of any patent granted on the instant application that would extend to the expiration date of the full statutory term as defined in 35 U.S.C. 154 to 156 and 173 of the prior patent, as presently shortened by any terminal disclaimer, in the event that it later: expires for failure to pay a maintenance fee, is held unenforceable, is found invalid by a court of competent jurisdiction, is statutorily disclaimed in whole or terminally disclaimed under 37 CFR 1.321, has all claims cancelled by a reexamination certificate, is reissued, or is in any manner terminated prior to the expiration of its full statutory term as presently shortened by any terminal disclaimer.

Check either box 1 or 2 below, if appropriate.

DETAILED ACTION

Specification

1. If applicant continues to prosecute the application, revision of the specification and claims to present the application in proper form is required. While an application can be amended to make it clearly understandable, no subject matter can be added that was not disclosed in the application as originally filed. In summary, the disclosure of the present application should be the same as that of the first application with the claimed changes namely; 800-2500Hz and the new drawings incorporated into the original specification.

Claim Objections

2. Claims 21 and 22 are objected to because of the following informalities: The claims are in a dependent form and therefore, cannot be examined. Thus, the applicant is advised to incorporate the newly written claims in the original claimed subject matter in order to put the claim(s) in an independent form thus making it possible to examine the claimed subject matter. Appropriate correction is required.

3. The applicant is advised to incorporate the newly claimed changes into the original specification and claims and file the application as such in order to put the application in condition for examination.

Double Patenting

4. The non-statutory double patenting rejection, whether of the obviousness-type or non-obviousness-type, is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent. *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); and *In re Goodman*, 29 USPQ2d 2010 (Fed. Cir. 1993).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(b) and © may be used to overcome an actual or provisional rejection based on a non-statutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.78(d).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

In layman's terms, the applicant seems to disclose the same subject in both applications namely, shielding a hearing aid against electromagnetic field and therefore, the applicant would have to file a terminal disclaimer in order to put the application in condition for allowance which means that the new application (08/835,350) would be allowed on the basis that the original and the new application would expired at the same time and if the applicant decides to sell the claimed subject matter, both would have to be given to the buyer.
